TECHNICAL SKILLS:

Front End: *JavaScript, HTML5, CSS3(Sass), React(Redux)*

Back End: *Node.js(Express), MongoDB(Mongoose), PostgreSQL, RESTful API*

Developer Tools: *Git, npm, Webpack, Babel, Agile Methodology, TDD*

Experience With: *Jest, Jasmine, Mocha, Chai, Travis CI, AWS EC2*

APPLICATIONS:

Airbnb Product Page

React | NodeJS(Express) | Mongoose | AWS EC2 | CSS

A functional mock-up of a sample Airbnb product page utilizing a proxy server to connect remotely hosted modules

- Developed a self-contained **review module** with 100 points of data and deployed static content using **S3 buckets**.
- Deployed a **proxy server** combining 5 individually developed servers handling http requests using AWS EC2 instance and populating the modules from their individual databases.
- Transpiled **React CSS Modules** with Webpack to avoid naming conflicts with other modules.

Real time Chat Room

React | NodeJS(Express) | PostgreSQL | SASS

A platform where you can chat with friends and others.

whispering-badlands-74800.herokuapp.com

- Using **socket.io** to render real time messaging between users.
- Collaborated with a UI/UX designer to illustrate design ideas, and bringing them to life with **React SASS modules**.
- Made signing up for an account super easy by **authenticating users** with Google, Facebook, and Github passport.js strategies.

EXPERIENCE:

UPS Quality Assurance Coop

2017 - 2018

- Worked with Quality Assurance team to create automated test scripts in Jmeter.
- Simulated exception packages to compare against calculated exception package volume for backend applications, and sent feedback to development team.
- Used selenium to test front-end applications, reported bugs to the front-end team.

EDUCATION:

Essex County College, *A.S. in Software Development*

2017

Hack Reactor, *Advanced Software Engineering Immersive Program*

2018
